

ALONE

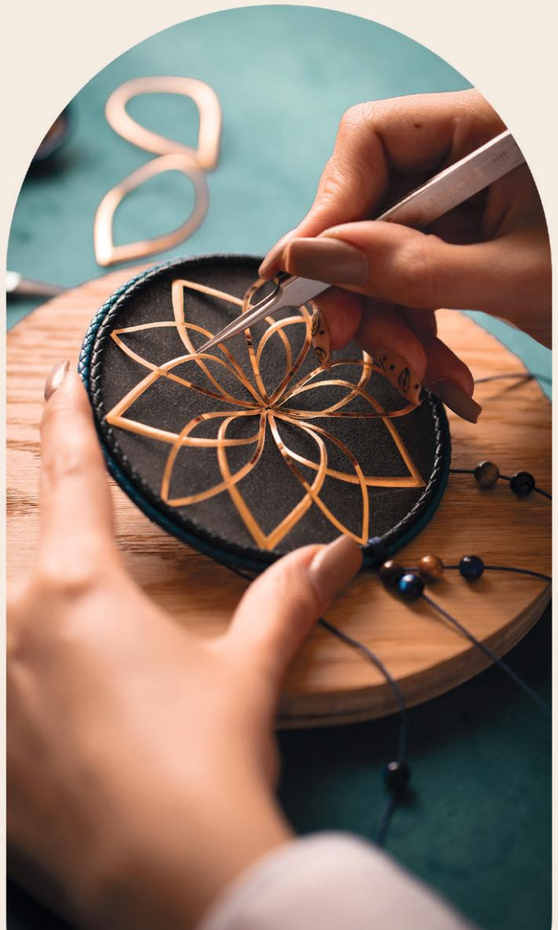

24K Gold Luxury Handmades

ALONE
INTRODUCTION

Life in the past or the future?!
When you see ancient artworks, what feelings do you have?
Do you tend to appreciate the art of the ancients more, or do you prefer modern art?
Prehistoric art and the works of cave dwellers often consist of primitive paintings and sculptures of animals and humans. What is commonly referred to as 'New Art History' has persisted for a generation, involving a reevaluation of our thinking and narratives about the histories of tangible objects.
Iranian art stands as one of the richest artistic heritages in world history, encompassing various disciplines such as architecture, painting, weaving, pottery, music, dance, calligraphy, metalwork, and countless other artistic forms.

In the palaces of the Achaemenid era, with the collaboration of the entire nation, efforts were made to present an image of that period. Many artistic techniques were employed in their construction, including stone carvings, intricate color details, gold and bronze coatings, and patterns on interior objects within the buildings. These are some of the artistic achievements that have been preserved from the Achaemenid era.

Now, at Alone, we are adorning the canvas of Iran and world history with a tapestry of gold through the reinterpretation of these artworks.

Patina Painting

Patina is a painting technique. The term 'patina' refers to any signs of ageing on antiques. That "old look" usually gives an object a rich and attractive appearance.

3D Formation

The whole curvation process for each section is specifically done by hands.
